

今回の授業の対応範囲は以下のとおりです。示されたアーカイブ授業をしっかりと受講した上で予習に臨んでください。

● スタンダード…2019年 第3、4、5講「不定詞」「動名詞」「分詞」 ●

**1** 和訳しなさい。辞書を用いて、時間をたっぷりかけましょう。

(1) Scientists studying atomic energy are in debt to Einstein. In the same way, the scientists of Newton's day got their start in mathematics by studying textbooks written by a Greek named Euclid 2000 years ago.

(2) Watching the shadow on the ground, one could know the days when the noon shadow is shortest or longest. (東京農工大)

(3) He dreaded playing a solo, convinced he would do terribly.

(4) Always say "Yes" just to get along with the crowd, and you will end up being known as someone with no opinions of their own. (佐賀大)

(5) Basing a belief that is outside the field of science on a scientific fact is problematic, but it's much worse when the "scientific fact" turns out to be false. (群馬大)

(6) We in the English-speaking world have become very lazy, expecting others to learn English without our making the same effort in return.
